

Outdoor Vinyl

2020 INSTRUCTIONS

Suggested Surfaces: Glass Canister, Water Bottle, Mason Jar, Tumbler, Stemless Wine Glass, Campfire Mug, Beer Mug

Outdoor Vinyl is stickier than regular vinyl. It's great for surfaces that are 'used' regularly.

Step 1: Wash surface thoroughly.

Step 2: Peel the backing off of the Outdoor Vinyl and place it on your surface in the desired location. Use a scraper card to securely adhere the vinyl to the surface.

Step 3: Slowly peel back the transfer tape from the entire design. If the vinyl isn't sticking, place the transfer tape back over the design and go over it with the scraper card again. Slowly peel back the transfer tape.

**With multiple color designs, do the base/bottom layer first. Repeat the same steps for all layers.*
